MOBILE HEALTHCARE SERVICE

12th June 2018

To whom it may concern,

I am writing to confirm Dr. Amr Mahmoud Salem Mohamed's significant contribution to Hamad Medical Corporation. I am the Associate Medical Director of Mobile Healthcare Services, part of the National Hamad Medical Corporation Ambulance Service and have collaborated on published research with Dr Amr with two other research projects currently being prepared for analyses and submission.

Hamad Medical Corporation is a nonprofit healthcare provider in Qatar that provides secondary and tertiary healthcare via twelve different hospitals, the National Ambulance Service, and residential care services.

Within Mobile Healthcare Services we have been very grateful for the opportunity to participate in research and collaboration with Dr. Mohamed's team and in particular his smart Health system, which facilitates remote patient treatment and health monitoring through sensors and smartphone technology.

Specifically, we are actively planning to use Dr. Mohamed's system on an experimental basis at one of our inpatient sites in order to collect real time medical information from our patients to better predict poor outcomes so that intervention can be provided immediately. It is an exciting project and Dr. Mohamed's research vitally supports our values and mission to provide superior healthcare through innovative solutions.

If I may answer any further questions regarding Dr. Mohamed's contributions in this venture, please do not hesitate to contact me.

Sincerely,

Dr. Mark O'Connor
Associate Medical Director HMCAS
Mobile Healthcare Service
Corp. # 039895
